2) an optical recording medium on which data is recorded, comprising: a resync pattern inserted between predetermined data ranges according to a digital sum value (DSV) corresponding to a proportion of positive data and negative data included in the data ranges, **the resync pattern being such as to minimize differences in DSV between the data ranges.** (bold language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
